📍 Ahmedabad, Gujarat

PROFESSIONAL SUMMARY

Senior iOS Developer with 5 years 6 months of experience designing, developing, and maintaining high-quality iOS applications across social media and business domains. Proven expertise in Swift, SwiftUI, UIKit, and modern architectures including MVVM and MVC. Strong background in building scalable, maintainable applications, integrating RESTful APIs, optimizing performance, and mentoring junior developers. Skilled at collaborating with cross-functional teams to deliver user-centric solutions that enhance engagement and drive business growth.

TECHNICAL SKILLS

Programming Languages:	Swift (Advanced)
Frameworks:	SwiftUI, UIKit, Combine, Core Data, AVFoundation, AVKit
Architecture:	MVVM, MVC, SOLID Principles, Clean Code, Design Patterns
Core Concepts:	Object-Oriented Programming (OOP), Data Structures & Algorithms
Concurrency:	Grand Central Dispatch (GCD), Async/Await, Multithreading
Networking:	RESTful APIs, JSON Parsing
Tools & Package Managers:	Xcode, Swift Package Manager (SPM), CocoaPods
Version Control:	Git, GitHub
DevOps:	CI/CD, Automated Builds
Security:	iOS Security, Keychain
Process:	Agile / Scrum
Debugging & Performance:	Debugging, Xcode Instruments

PROFESSIONAL EXPERIENCE

Senior iOS Developer

May 2024 – Feb 2026

Droisys India Pvt Ltd, Ahmedabad, India

- Led development and maintenance of high-performance iOS applications, ensuring stability, scalability, and optimal user experience.
- Designed and implemented advanced features and reusable components to streamline development and reduce delivery timelines.
- Optimized application performance by identifying and resolving bottlenecks, crashes, and memory issues.
- Integrated third-party libraries and frameworks while maintaining compatibility with existing systems.
- Implemented automated build, testing, and deployment pipelines to improve release efficiency and reliability.
- Collaborated with Product, Design, and QA teams to deliver high-quality features on schedule.
- Played a key role in architectural decisions using MVVM, SOLID principles, and clean architecture standards.
- Led code reviews and enforced iOS best practices to maintain code quality and long-term maintainability.
- Updated technical documentation to reflect system architecture and application workflows.
- Collected and analyzed user feedback to continuously improve usability and overall app performance.
- Debugged and resolved critical production issues with timely and effective solutions.
- Mentored junior developers, conducted knowledge-sharing sessions, and contributed ideas for new features and improvements.

Senior iOS Developer
Hidden Brains InfoTech, Ahmedabad, India

Oct 2022 – Feb 2024

- Enhanced iOS application performance by identifying and resolving system bottlenecks and memory issues.
- Integrated third-party libraries and frameworks while ensuring application stability and backward compatibility.
- Streamlined the codebase to improve readability, maintainability, and long-term scalability.
- Implemented automated build and deployment processes, improving release efficiency.
- Developed reusable components and modules, reducing development effort across multiple projects.
- Collaborated with Product, Design, and QA teams to deliver high-quality iOS features on schedule.
- Contributed to architectural planning and technical decision-making using MVVM and SOLID principles.
- Led code reviews and enforced iOS best practices to maintain high-quality, scalable codebases.
- Updated technical documentation to reflect application architecture and system workflows.
- Presented project progress, milestones, and achievements during internal review meetings.
- Designed and implemented user-friendly UI components for seamless application experience.

Junior iOS Developer
Xongolab Technologies LLP, Ahmedabad, India

Mar 2022 – Sep 2022

- Assisted in development and maintenance of iOS applications, ensuring performance and responsiveness.
- Improved application performance by identifying and resolving code-level bottlenecks.
- Collaborated with senior developers to implement new features and enhancements.
- Performed testing and debugging to ensure stable and smooth application functionality.
- Integrated third-party libraries while maintaining compatibility with existing systems.
- Maintained and updated technical documentation for system architecture and workflows.
- Participated in team discussions and contributed ideas for feature and performance improvements.

Junior iOS Developer
Addit Infotech, Rajkot, India

Jul 2021 – Mar 2022

- Assisted in development and maintenance of iOS applications focusing on performance and stability.
- Conducted testing of application modules to identify bugs and improvement areas.
- Collaborated with development team to implement new features and enhancements.
- Integrated third-party libraries ensuring application stability and compatibility.
- Maintained technical documentation reflecting system architecture and workflows.
- Contributed ideas in team meetings for improving system performance and user experience.

Junior iOS Developer
ZerOnes, Rajkot, India

Mar 2019 – Jun 2020

- Assisted in building and maintaining iOS applications under senior developer guidance.
- Contributed to debugging and issue resolution to improve application stability.
- Supported implementation of new features and optimization of existing code.
- Integrated third-party tools and frameworks ensuring seamless functionality.
- Maintained project documentation reflecting application structure and updates.
- Participated in internal discussions and contributed ideas for improving app performance.

PROJECTS

Account360 AI

[App Store Link](#)

Developed a cross-platform sales enablement application for the alcohol and beverage industry (iOS, iPad, Web) that centralizes customer data into a single platform to improve sales productivity and decision-making.

Implemented key features including AI-powered insights, image recognition, market share analytics, real-time reporting, and multi-supplier/distributor management to support field and enterprise sales teams.

Focused on building a scalable and high-performance application enabling executives and sales teams to access actionable data, improve customer engagement, and drive business growth.

MRS Portal

[App Store Link](#)

Developed a customer-facing mobile application enabling users to register online, check prices, place orders, and manage logistics operations including loading tickets, pickups, and delivery confirmations.

Provided end-to-end workflow management features such as scheduling loading tickets, printing waybills, and tracking order status in real time to improve operational efficiency.

MRS Operations

[App Store Link](#)

Built an operations management application for customers, vendors, and employees to monitor and manage fuel requests, delivery requests, bowser allocation, and site inspections.

Implemented real-time status tracking and updates for operational workflows, enabling transparency and faster decision-making across ground-level processes.

Rockeye Transporter

[App Store Link](#)

Developed a transportation management application to streamline fleet operations, trip planning, and driver management for logistics businesses.

Implemented features for trip creation, route optimization, fleet tracking, driver assignment, and compliance monitoring including maintenance and license tracking.

Enabled real-time operational visibility for fleet owners and logistics managers to improve efficiency and reduce manual coordination.

XLGrocery Partner

[App Store Link](#)

Developed an on-demand grocery delivery partner application that acts as a bridge between store partners and customers for managing online grocery deliveries.

Implemented real-time order notifications, enabling partners to instantly receive and respond to new delivery requests.

Built end-to-end order management workflow including order acceptance, processing, and completion for smooth and efficient operations.

Supported both online and offline store modes to handle different business requirements and improve flexibility.

EDUCATION

Bachelor of Computer Applications (BCA)

Saurashtra University, Rajkot, India

Shri M.N. Kampani Arts and Shri A.K. Shah Commerce College, Mangrol, India
